

HOW TO MAKE A SIERPINSKI TRIANGLE – Fractals

1.
 - Draw an equilateral triangle pointing up - **ABC**.

2.
 - Mark the mid points of AB – **E**, AC – **F**, and BC - **G**
 - Connect EFG to make a small triangle pointing down inside the big triangle.

3.
 - Mark the mid points of FGC - **HiJ**
 - Connect HiJ to make a small triangle pointing down inside that triangle.

4.
 - Repeat these steps for each of the outside triangles as many times as you like.
