

Maths Word Problems

Monday:

Evil Pea throws 5 tins of baked beans at Supertato. He then throws 4 more tins of beans. How many tins of beans does Evil Pea throw in total?

Tuesday:

Carrot is stuck to the conveyor belt with 8 plasters. Supertato removes 3 plasters. How many plasters are left to remove?

Wednesday:

6 vegetables celebrate catching Evil Pea. 5 more vegetables come to celebrate. How many vegetables are celebrating in total?

Thursday:

Supertato builds an enormous jelly to help capture the evil pea. He uses 4 bowls of water to make it and then decides to double it. How many bowls did he use altogether?

Friday:

Supertato checked the freezer to see how many packets of peas were frozen. There were 10. The next day, 4 packets had gone. OH NO! How many were still in the freezer?
