

7.2 SHOPPING EXERCISE

Objective: Solve problems.

Instructions

1. You need a till receipt from a supermarket trip
2. Count the number of items bought (or stop at 20). Do that many hops around the lounge/garden. ,Look at the price of any item on the receipt. What is the first digit?,Look at the price of a different item on the receipt. What is the last digit?,Add the two digits together
3. Try to do a balance on your right foot and left hand for that many seconds. Can you do it with your eyes closed?,Repeat with different items, choosing the first digit of one, and the last digit of another, adding the two digits and then balancing for that many seconds in lots of different ways. Use your hands, your feet, your knees, elbows and other points on your body that make a safe balance.

Challenge

Can you do three?

Choose 3 digits from any 3 different items on the receipt. Add them up and balance in different ways for that long.
