

## Lapwing

**It has been lovely to have everybody back together in Lapwing Class!**

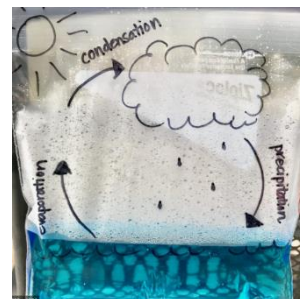

We spent lots of time learning about the zones of regulation during our first week back at

school. This was a fantastic way to see how everybody was feeling about returning to school and to help us understand our behaviour/how we can manage our feelings better.

## Geography

We have continued to enjoy our topic all about Europe. We enjoyed exploring maps and using compasses/the cardinal points to navigate our way around school. We applied these skills to creating our own map and 'programming' our partners to find the 'treasure'.

We have also learnt about the water cycle and we have replicated the processes (condensation, precipitation and evaporation) in a plastic bag so that we could observe what happens.

## Maths

We have enjoyed starting our new topic, fractions, we recapped what fractions were by getting outside into the forest school area. We made parts of a whole using sticks. This was a great starting point for a rich discussion. We thought about the fact that each part must be an equal size, reminders about what numerator and denominators are, unit and non-unit fractions and equivalent fractions (some people noticed that 2 putting their parts together would make the same amount as another fraction e.g.  $2/6 = 1/3$ ).
