

# Parent Guide

## How can I use this with my children?

To help your child work out the answers, you could encourage them to cross out the number of sweets they are subtracting from each group and count the remaining ones.

## How does this help my children's learning?

This activity can help your child learn to subtract a 1-digit number from another 1-digit number; using images to help.

## Ideas for further learning:

Using groups of objects (such as toys or coins), make subtraction calculation that your child can do physically by removing so many toys (e.g. take 3 cars away from this group of 7 cars).
