3 A shop has 48 apples.
They are set out in 8 equal rows.

How many apples are in each row?

1 mark

4 Use the array to complete the calculations.

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

2 marks

5 Complete the calculations.

$$5 \times 5 = \underline{\hspace{2cm}}$$

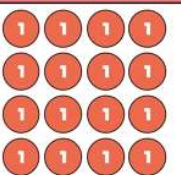

$$5 \times 50 = \underline{\hspace{2cm}}$$

2 marks

6 Calculate 4×14

Tens	Ones
	

1 mark

7 Calculate $75 \div 3$

Tens	Ones
	

1 mark

8 Calculate.

$$33 \times 5$$

2 marks

9 Use the part-whole model to calculate $64 \div 4$
